SARITA GORE
Angular Frontend Developer

Mobile: 9527809816   **Email ID:** saritagore21@gmail.com   **Address:** Pune, Maharashtra 412105
DOB: 21-02-1992   **LinkedIn:** *www.linkedin.com/in/sarita-gore*

Highly motivated software engineer with 3+ years of experience seeks to leverage expertise in Angular, Vue.js, and front-end development best practices to excel as an Angular Frontend Developer within a dynamic computer software/engineering environment. Proven ability to develop and maintain high-performance web applications, optimize performance, and enhance user satisfaction. Seeking to contribute to innovative projects while collaborating effectively with teams to drive exceptional results and support company growth within a challenging and rewarding role.

Professional Summary

- Front-end software engineer with a strong background in developing high-performance web applications using Angular, Vue.js, and JavaScript.
- Successfully developed and maintained Angular-based Contract Management Systems, streamlining data entry, validation processes, and improving user efficiency.
- Collaborated with backend teams to integrate RESTful APIs, significantly enhancing application performance and reducing load times.
- Designed and implemented chatbots for internal communication, boosting collaboration and knowledge sharing across teams.
- Skilled in building self-contained, reusable, and testable modules and components, improving development efficiency and productivity.
- Proficient in HTML5, CSS3, Bootstrap, SASS/SCSS, TypeScript, Docker, and Git, adhering to best practices for performance optimization and accessibility.
- Expertise in converting UX designs into responsive, functional web templates, demonstrating strong problem-solving skills and collaboration with cross-functional teams.

Work Experience

Software Engineer   Jun 2022 - Oct 2023
StraViso India (Pune)

- Engineered and maintained a new Angular-based web portal designed for contract management, streamlining data entry and validation processes.
- Collaborated with the backend development team to integrate RESTful APIs, optimizing application performance and reducing load times.
- Developed self-contained, reusable, and testable modules and components, improving development efficiency and code maintainability.
- Designed and implemented chatbot solutions to enhance internal team communication and information sharing.
- Conducted training sessions for internal users on utilizing chatbots for efficient communication and task automation.

Junior Software Engineer   Feb 2018 - Jan 2020
InfoTech World (Pune)

- Designed and developed interactive educational games using HTML graphics for an e-learning platform, creating engaging and effective learning experiences.
- Translated UX design concepts into functional and responsive web templates, ensuring seamless user experiences across various devices.
- Implemented best practices in frontend development to optimize website performance and accessibility, adhering to industry standards.
- Proactively pursued self-directed learning opportunities to expand technical skills and knowledge, demonstrating a commitment to professional growth.
- Assisted senior engineers with complex tasks, gaining valuable hands-on experience in software development.
